Apple iPad App of the Day: Camera

Pre-installed on the iPad2, the Apple camera feature allows the user to take high-resolution photos and video from both the front and rear cameras.

Unbelievable moments get believable when you capture them on iPad. Its 5-megapixel iSight camera has HDR support for perfectly balanced exposures. If the moment calls for motion, shoot a video instead. iPad does that, too — in 1080p HD.

There are a variety of photo editing apps available for free on the App Store to make sure your photos look their best.

Found an App you can't live without? Tell us!

Teachers, have you found an interesting app for the iPad that you've been using in your classroom? Share the love with everyone! We'll feature it in an upcoming edition of the *Mustang Moment*. E-mail cindi.herr@cherokee.k12.nc.us with the name of the app in the subject line, and something you love about it. Thanks!
